

2026-2027 Elections

Region 3 Representative Nominee

Liz French

My name is Liz French. I am a School Psychologist with more than 20 years of experience. I am currently enjoying my work with Orange County Public Schools. I recently completed my ABSNP in school neuropsychology. I previously worked in Brevard Public Schools part-time for one year. Before moving to Florida, I worked in Colorado. I have been able to gain experience in both a very small rural mostly monolingual Spanish district with a largely migrant population and some large urban districts with a wide variety of needs and resources. I have worked as a school psychologist in birth to 3, child find, elementary, and secondary settings, gaining extensive experience with students across developmental stages and a wide range of academic, behavioral, and social-emotional needs. I have served on a wide variety of committees throughout the years in various districts. I have enjoyed presenting at conferences and have publications with journals, book entries, and other resources. My most recent topic has been the trauma we as school psychologists can experience when we respond to crisis events. I have been working on this with colleagues to present on how we are impacted and the care we need as caregivers.

I attended the University of Northern Colorado for graduate school where I earned my Ed.S. and I am ABD for my Ph.D. I have previous experience helping arrange conferences at the University of Northern Colorado. I helped run a distanced-education program helping teachers in rural areas of Colorado retrain to become School Psychologists. I was an officer in a group working to get a School Neuropsychology certification organization off-the-ground. FASP is a wonderful and strong state organization, and I believe we have the power to make substantial change for the positive both through our advocacy and through our offerings of professional development opportunities. This is a time to refresh, renew, and reconnect. Beyond just ensuring you have the credits needed for certification. I have enjoyed my time on the board as your East Central Representative advocating for additional professional development opportunities. I look forward to collaborating with our professional development group on these activities. Please use me as a resource. I am excited for the future of FASP.
